Emergency Aid Camp Infrastructure

P&G Purifier of Water

Making contaminated water potable through coagulation and disinfection in as little as 30 minutes.

Extensive laboratory and field testing has proven P & G Purifier of Water to be robust and efficient in eliminating turbidity, viruses, chlorine resistant parasites, bacteria and pollutants. (P&G Health Sciences Institute)

Potable water in as little as 30 minutes

The diagram consists of four numbered steps in red boxes:

- 1. MIX**: Shows a hand pouring a sachet into a bucket labeled '10 liters'.
- 2. STIR**: Divided into two 5-minute sections. The first says 'Stir well.' with a clock icon. The second says 'Let water stand.' with a clock icon. Below, it says 'If water is not clear, stir again until the floc is separated.' and shows a bucket labeled '10 liters'.
- 3. FILTER**: Shows water being poured through a cloth into a bucket. Text says 'Use clean thick 100% cotton cloth without any holes.' and 'Dispose of the filtered floc away from children and animals.' A clock icon indicates 'Wait for 20 minutes'.
- 4. DRINK**: Shows a bucket labeled 'Prepared water' and a glass. Text says 'Do not drink if water is yellow in color.' with a crossed-out glass icon.

Each sachet is suitable to treat 10 litres / 2.5 gallons of water
